

MORE ENERGY, MORE GROWTH, MORE YIELD.

HOW TO APPLY FULL SUN™

- Recommended dose of 64 ounces per acre.
- Foliar application on corn stages V3-VT.
- Foliar application on soybeans stages V6-R1.

FOLIAR APPLICATION BEST PRACTICES

- Maintain spray water pH between 5.5 and 6.2 for optimal microbial activity.
- Practice JUST-IN-TIME DELIVERY at the field.
- Store above freezing temperatures.
- Do not apply Full Sun™ during a stress event.

KEY INGREDIENTS

- Amino acids
- Zinc
- Magnesium
- Calcium
- Boron
- Iron
- Manganese

SEEING IS BELIEVING

The telltale signs of Full Sun™ on your acre – broad, healthy leaves, bigger ears and kernels, and more robust roots. With Full Sun™, you can finally achieve a more effective and efficient plant.

Stressors can lead to up to a 50%¹ decrease in yield potential, but that's not your problem. Not with BW Fusion. Full Sun™ was tested on both corn and soybeans with a win rate of over 80% and an average of 3%-8% yield increase.
