

# AMINO

## DON'T JUST FEED YOUR CROPS. FUEL THEIR FULL POTENTIAL.

AmiNo is the only product on the market that delivers a dual-action nitrogen strategy to push your crops further. It doesn't just add nitrogen – it makes your crops better at using what's already there. That's the kind of ROI you can expect.

The free amino acids in AmiNo reduce the energy your crops need to convert and move nutrients. That means sugars, nutrients, and growth signals move faster and more efficiently throughout your plants – and that means better growth.

### 5 WAYS AMINO HELPS CROPS FINISH STRONG.

1. Boosts nutrient efficiency.
2. Reduces nitrate buildup.
3. Helps lower total nitrogen usage.
4. Improves sugar production for stronger plants.
5. Defends against stress and helps retain yields.

### WHAT'S STRESSING YOUR CROPS?

#### NITRATE BUILDUP

With molybdenum and free amino acids, AmiNo helps plants convert nitrate to a plant-friendly protein version of nitrogen. That means they can access the nutrients they need for peak performance all season long.

#### LACK OF LATE SEASON ENERGY

As the season winds down, crops need protein to finish strong. But converting nitrogen takes 20%-30% of their daily energy – energy they can't afford to waste. AmiNo delivers free amino acids directly, skipping the conversion process so plants get exactly what they need, exactly when they need it.

# GET MORE FROM YOUR NITROGEN.

## HOW TO APPLY AMINO

- Recommended dose of 16-24 ounces per acre when applying V3-V8.
- 16-24 ounces In-furrow or 2x2
- Recommended dose of 32 ounces per acre when applying V9-R4.
- AmiNo is suitable for corn and soybeans.
- Tank-mix compatible and easy to use.

## APPLICATION BEST PRACTICES

- Maintain spray water pH between 5.5 and 6.2 for optimal performance.
- Practice JUST-IN-TIME DELIVERY at the field.
- Store above freezing temperatures.

## KEY INGREDIENTS

- Free amino acids
- Nitrogen
- Molybdenum
- Cobalt
- Nickel

## A PROVEN GO-TO SOLUTION.

In national trials, AmiNo tackled nutrient deficiencies head on. The results speak for themselves:

**8 bushel/acre**  
*increase in corn*

**5.5 bushel/acre**  
*increase in soybean*

With a win rate of over 78% compared to standard grower practices, AmiNo is a proven go-to solution for boosting your crops' vitality. Whether you're chasing top-end yield or protecting your crop from stress, AmiNo is your all-in-one foliar solution. It's nitrogen made smarter, nutrients made faster, and performance made better.

Stressors can lead to up to a 50%<sup>1</sup> decrease in yield potential, but that's not your problem. Not with BW Fusion. When stress hits, we'll help you hit back harder.
