

# PLANTER BOX TREATMENT

BioBoost™ Soy is a groundbreaking planter box treatment that boosts seed germination, accelerates metabolism and ensures uniform early growth. Powered by Environoc®, it delivers essential microbes and nutrients without the need for in-furrow application, eliminating the need for talc and graphite.

## 5 WAYS

## BIOBOOST™ SOY POWERS UP YOUR SEED

1. Enhances your seed spermosphere.
2. Increases seed energy to improve even growth.
3. Enlarges root system and stem diameter.
4. Improves key nutrient uptake all season long.
5. Bolsters crops' stress tolerance.

### KEY INGREDIENTS

- Environoc® Seed Treatment
- Essential amino acids
- Complex food sources, including microalgae
- Zinc, cobalt, molybdenum, iron, and manganese

### APPLYING BIOBOOST™ SOY

- Recommended rate of only 0.5 ounce per unit of seed.
- Apply as a seed lubricant in the planter box.
- Comes ready to use and can be applied to the seed before or at the time of planting.

### APPLICATION TIPS

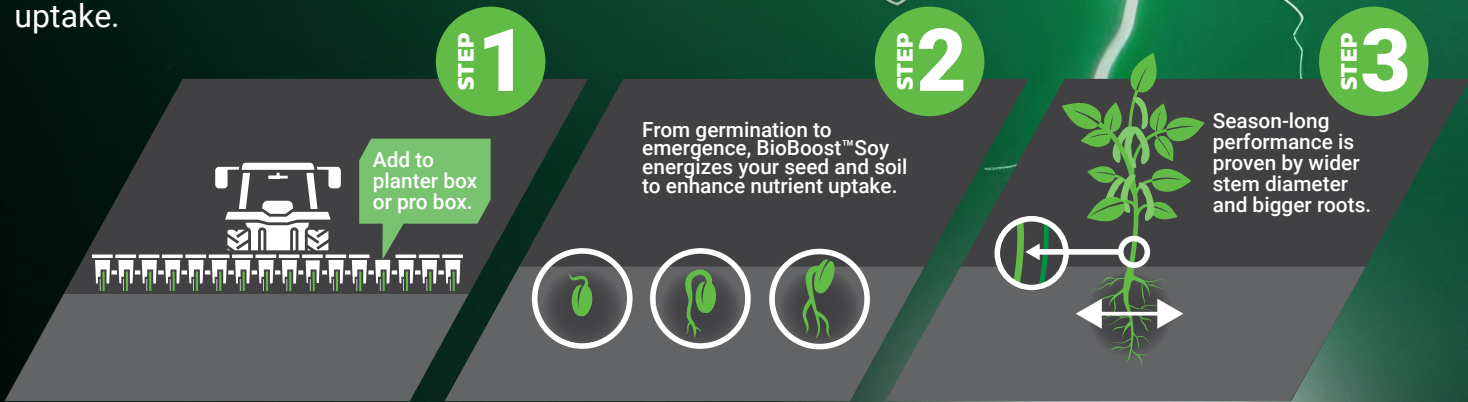

- **For bulk-fill planters:** Spread one pail of BioBoost™ Soy on the seed in the top of the pro box before it's transferred into the planter or seed tender.
- **For individual seed box per-row planters:** Add unit of seed to box, spread 0.5 ounce BioBoost™ Soy on top of seed and stir until treatment is evenly applied to seed.

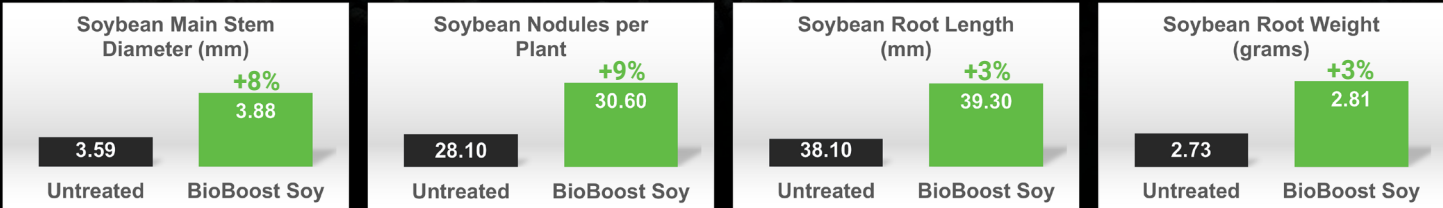

# HOW IT WORKS

Since BioBoost™ Soy is a planter box treatment, it begins to work as soon as your seed enters the soil. Soybeans are boosted for their entire lifecycle — starting with **more even emergence and improved vigor** all the way through to the fertility stage. BioBoost™ Soy’s season-long performance will be apparent when you see larger roots and wider stem diameters that enable each plant to maximize its nutrient uptake.

## TRUST THE DUST™

Trials were conducted over large geographic areas with various soil types and measured physical parameters, nutrient uptake, photosynthetic rates and chlorophyll density. Results showed increased stem diameter, shoot weight, and root length and weight. With data like this, **you know you can trust the dust.**
