

BW SEED TREATMENT

Enhance the germination of your seeds

BW Seed Treatment, powered by Biodyne®, will give your crops an optimal foundation for growth by delivering all-organic, naturally-occurring microbes to your soil. This seed treatment includes microbe strains that work like iron magnets, boosting iron uptake and triggering nodulation right from the very beginning. The result is more nitrogen-rich bacteria colonies, visible through early plant color and growth. These benefits continue well into the growing season, even after traditional crop protection fades away.

GERMINATION: Proven in a recent study to boost germination rates by 10%, surpassing 38 competing treatments. Plant with confidence and maximize your germination rate.

SOIL: Optimizes soil cycling and nutrient release within the rhizosphere. Increases levels of nitrogen, phosphorus, and iron in your soil.

BIODYNE MICROBIAL TEAM: Proven to deliver multifaceted benefits, it nurtures optimal seed growth seamlessly from germination through critical rhizosphere development.

PRODUCT FEATURES

- » **ENHANCES NITROGEN AVAILABILITY** for plants by leveraging free-living nitrogen-fixing microbes
- » **IMPROVES NUTRIENT UPTAKE** by solubilizing insoluble forms of phosphorus
- » **STIMULATES PLANT GROWTH** with hormone facilitators
- » **BOOSTS ROOT ZONE HEALTH** by releasing beneficial vitamins
- » **CAPTURES IRON** through the release of compounds (siderophores) for enhanced plant absorption

RATE: 1.5-2 oz./50 lb. of seed

APPLICATION: Apply via seed treater

- » Compatible with other on-seed products
- » Do Not Freeze
- » For best results shake before using since settling can occur
- » Always perform a jar test to ensure compatibility.

POWERED BY BIODYNE®

Experience the revolutionary power of **Biodyne®** technology – a cutting-edge solution boasting a proprietary team of naturally occurring, non-GMO beneficial microorganisms. With a track record spanning over 30 years, these nonpathogenic microbes have demonstrated their prowess in unlocking soil health, optimizing nutrient efficiency and providing unparalleled stress mitigation. Transform your operation with the bold assurance of **Biodyne®** technology – where innovation meets proven excellence.
